

Marinos Tselani

Junior Software Engineer | Informatics and Computer Engineering Graduate

marinotselani12@gmail.com +30 6981069784 Athens, Greece https://github.com/mrns20

Summary

An Integrated Master's (M.Eng.) graduate in Informatics & Computer Engineering, interested in software engineering, data science, and machine learning. Concrete project experience spanning full stack development, applied machine learning and data science.

Programming Languages :Python, Java, C++,C#, JavaScript, TypeScript, Kotlin

Education

University of West Attica — Integrated Master's Degree

Informatics & Computer Engineering — October 2020 - February 2026

Software and Information Systems Stream

Projects

Full-Stack Hotel Reservation Management Website

Built a full-stack hotel booking platform with a 3-person team with Jira-Based workflow using Django (Python) and React/TypeScript, backend testing using Postman and implementing end-to-end automated testing with Cypress.

Tech Stack: Django, React, TypeScript, SQLite, Postman, Jira, Cypress

Big Data Analysis Project

Reduced feature dimensionality from 35 to 13 columns using Pearson correlation analysis on a 2,600+ record billionaire wealth dataset, then implemented and benchmarked three clustering algorithms (K-Means, DBSCAN, Hierarchical/Ward) in Python (pandas, scikit-learn), evaluating cluster quality via Silhouette Coefficient and SSE across k=3–10.

Tech Stack: Python, pandas, scikit-learn

Master's Thesis

"MyPython" Website, Designed and built for personalized learning path recommendations as the technical part of my Master's thesis, published through University of West Attica's institutional repository.

Tech Stack: Django, Python, React, Typescript, Postman, MongoDB

Virtual Gym in Unity

Built a small game-like application of a virtual gym, where the user can simulate workouts on a graphical enviroment.

Tech Stack: Unity, C++, C#

More Projects on Github

Experience

Ilias Landscaping Co. — Athens, Greece

Operations Assistant — June 2019 - Present

A part-time role alongside full-time university studies where I handle client coordination,on-site work and logistics for the family operation.

Certifications

Certificate of Proficiency in English — December 2017

University of Michigan

Multi-Agent Workflow Orchestration Using Waldiez — May 2025

Waldiez

Publications

[Master's Thesis]-Development of a Web-Based Application for Personalized Learning Path Recommendations to Enhance Skills

A human-centered web application that uses technologies to suggest personalized learning paths and help users enhance their skills through adaptive educational content.
